My Work

In this page, select Work folder on the left

The screenshot displays the Vocareum web application interface. At the top, a blue header bar contains the 'Vocareum' logo on the left, and 'My Classes', 'Help', and a user profile icon with the name 'test_student' on the right. Below the header, a white navigation bar shows the current path 'CSCI 561: Fall 2016 / Homework-1' on the left, and three buttons ('Submit', 'Instructions', 'Reports') and a dropdown menu ('Actions') on the right. The main content area is divided into two panels. The left panel, titled 'work/' at the top, contains a file explorer with two items: a folder named 'work' and a file named 'LatestSubmission'. A red arrow points to the 'work' folder, and a blue question mark icon is next to it. The right panel shows a text editor with a single line of text: '1 Choose a file to load from the Files menu on the left'. Above the text editor is a 'File:' label and an 'Auto Save: On' status. At the bottom of the right panel is a terminal window with the prompt '[ccc_be4f70365b_15051@prod_run_4 ~]\$'.

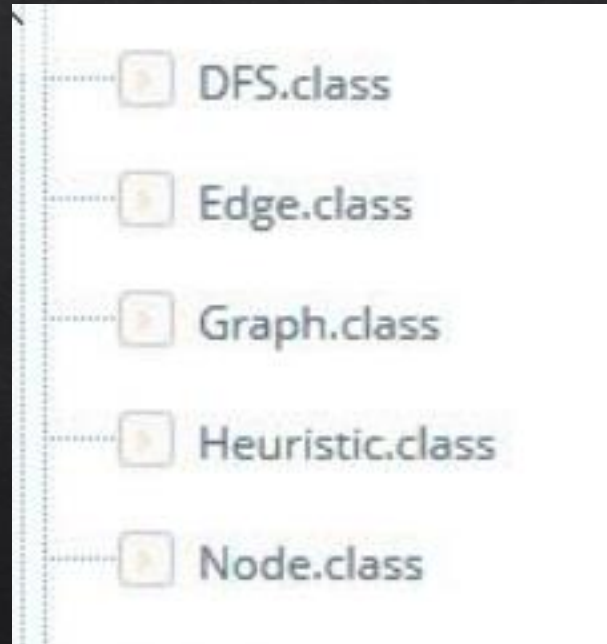

Make sure to name your main file properly based on homework description
(e.g. the image below shows proper name using Python 3)

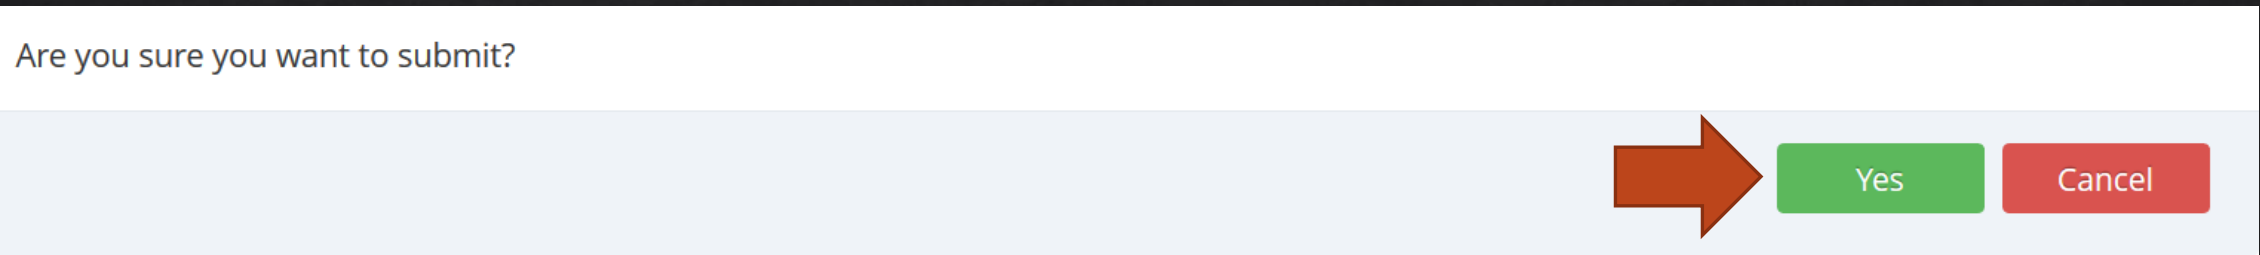

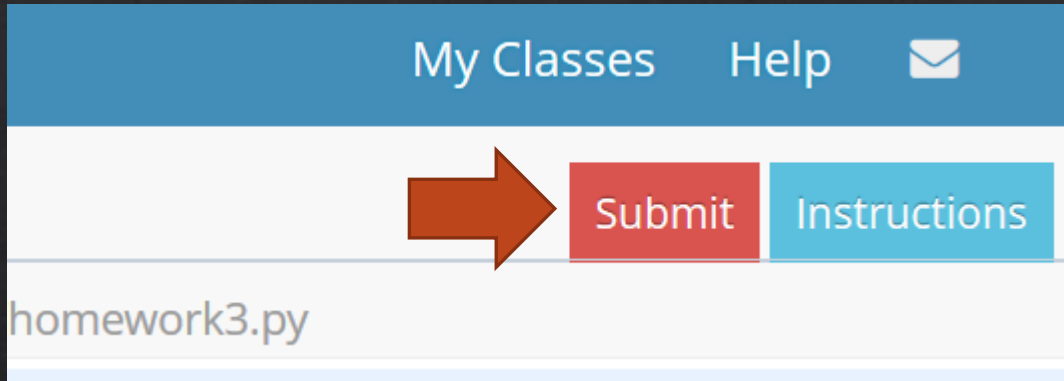

Press Enter and put your code in the file

The screenshot displays the Vocareum web interface. At the top, a blue header bar contains the Vocareum logo, navigation links for 'My Classes', 'Help', and a user profile 'test_student'. Below this, a white bar shows the current course 'CSCI 561: Fall 2016 / Homework-1' and action buttons: 'Submit' (red), 'Instructions' (blue), 'Reports' (dropdown), and 'Actions' (dropdown). The main workspace is divided into three sections. On the left, a file explorer shows a directory 'work/homework3.py' containing a file 'homework3.py' (highlighted with a red arrow) and a 'LatestSubmission' link. The central section is a code editor titled 'File: work/homework3.py' with a 'Saved' status and an upward arrow. It contains a single line of code: '1 #Your Code|'. A large red arrow points from this line to the file explorer. The bottom section is a terminal window with the prompt '[ccc_be4f70365b_15051@prod_run_4 ~]\$'.

You can add other files under your work folder if needed, for example:

Click on Submit and Press Yes

- ◆ You can now check the results
- ◆ You are able to submit as many times as you want and your final submission will be graded after the deadline
- ◆ If your code gives correct outputs for the two test cases, you should see the results as below:

Test Case 1

```
[ccc_be4f70365b_15051@prod_run_4 ~]$  
  
Waiting for Submission report  
[ccc_be4f70365b_15051@prod_run_4 ~]$  
  
[Executed at: Thu Sep 8 20:12:44 PDT 2016]  
  
Input File:  
BFS  
A  
D  
4  
A B 5  
A C 3  
B D 1  
C D 2  
4  
A 4  
B 1  
C 1  
D 0  
Content from your output file:  
A 0  
B 1  
D 2  
test case passed!
```

Test Case 2

```
Input File:  
A*  
A  
D  
4  
A B 3  
A C 3  
B D 2  
C D 1  
4  
A 4  
B 2  
C 1  
D 0  
Content from your output file:  
A 0  
C 3  
D 4  
test case passed!
```

◇ In case your output is not correct, you will get “test case **not** passed!” after your output lines.

```
test case not passed!
```
